

Green Apple Case

by Computer Harmony, Inc.

for iPod Nano

Say Goodbye to Forever Plastic.

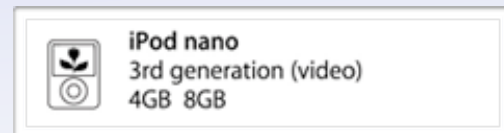

Green Apple Cases are a new, innovative product created with biodegradable plastic. The engineers at Computer Harmony are the first to bring this earth-friendly material to non-packaging applications. After placed in a compost environment, the case will 90% decompose within 80 days and totally within 6 months, as opposed to lasting nearly forever like normal plastic. This marks the beginning of the end for forever plastic.

Earth-Friendly Materials

- ▶ Cases created with 100% Biodegradable Plastic and Organic, non-toxic pigments
- ▶ Composting time compatible to natural cellulose
- ▶ US Certified as Compostable

Compatibility

Organic Colors

- ▶ Cases now available in:
Green, Blue, Red, and White

Brilliant Design

- ▶ Durable, Shock absorbing plastic helps prevent iPod Damage
- ▶ Sanded finish for grip-ability
- ▶ Raised bezel around screen and scrollwheel prevents scratching

Green Disposal

- ▶ Do not just trash the case when finished - a landfill is not a compost environment!
- ▶ To properly dispose, just include the case with the rest of your compost, or bury the case in fertile soil. With the proper conditions, it will 90% decompose within 80 days

Made Right Here

- ▶ All Computer Harmony products are designed and manufactured within the US for a safe and dependable product you can trust.
